

Assignment: Types of Computers

Course: Computer Applications

Instructions: Answer all questions. Submit your assignment as a PDF.

Section A: Multiple Choice Questions (MCQs)

1. Which computer is the fastest in the world?
 - a) Mainframe
 - b) Supercomputer
 - c) Microcomputer
 - d) Workstation
2. Which computer is primarily used by large organizations for bulk data processing?
 - a) Supercomputer
 - b) Minicomputer
 - c) Mainframe
 - d) Personal Computer
3. A laptop is an example of:
 - a) Microcomputer
 - b) Supercomputer
 - c) Mainframe
 - d) Workstation

Section B: True or False

1. Workstations are used for high-end graphics and engineering applications.
2. Microcomputers are multi-user computers used in industries.
3. Supercomputers are used for weather forecasting and scientific research.
4. Minicomputers are smaller than mainframes but can support multiple users.

Section C: Match the Following

Column A

Supercomputer

Mainframe

Microcomputer

Column B

Extremely fast, scientific simulations

Used in banks and airlines

Individual desktop or laptop

Workstation	High-end personal tasks
Minicomputer	Medium-scale industrial use

Section D: Short Answer

1. Define a supercomputer and give two examples.
2. Explain the difference between a mainframe and a minicomputer.
3. List three uses of microcomputers in daily life.

Section E: Diagram/Illustration

Draw a simple diagram showing the hierarchy of computers from Supercomputer -> Mainframe -> Minicomputer -> Microcomputer -> Workstation and label their uses.
